Endothelial Study Hans. P.

Objective - To explore the effect of Smoking ECIGSS on endothelial Function [Vasodilation] as compared to conv cigarette + NS.

Reason: Same as Accord Exercise

Milestones : Same / duration
External resource - Hanfi/i
Internal - Cardiologist + TBI, Stat (Diner)

Objective : To store to raw data from all PMNSA clinical trials in a state of the art database [to analyze data]

External:
Internal Resource - B. Nelson, IS

Research Studies: Han P.

① Accord Exercise Study

Objective: Explore the effect of Smoking ~~[redacted]~~ EHCSS on exercise tolerance and maximum oxygen capacity comp. to conv. cigarette & no smoking.

② Reason: To develop clinical models for the detection of clinical advantages of RP products (PREPS) - exposure

1 Research plan developed - June 30, 2002

2 Dev. Protocol - ~~[redacted]~~ 12/31/02

NO IRB

(academic) 3 clinical Performance - ~~Start~~ Finish June 30, 2003

3-4 month duration

4 Report and/or publication 12/31/03

Resources: External ~~[redacted]~~ TBD

Internal - 1 cardiologist, Qiwei
